

Complete List of DiMe Peer-Reviewed **Publications** Powering Scientific Research in our Field

Last updated December 5, 2022

Publication	# Citations
<u>Verification, analytical validation, and clinical validation (V3): the foundation of determining fit-for-purpose for Biometric Monitoring Technologies (BioMeTs)</u>	131
<u>Digital Medicine: A Primer on Measurement</u>	88
<u>Modernizing and designing evaluation frameworks for connected sensor technologies in medicine</u>	51
<u>Digital measures that matter to patients: a framework to guide the selection and development of digital measures of health</u>	44
<u>Remote Monitoring in Clinical Trials During the COVID-19 Pandemic</u>	41
<u>A systematic review of feasibility studies promoting the use of mobile technologies in clinical research</u>	38
<u>Advancing the Use of Mobile Technologies in Clinical Trials: Recommendations from the Clinical Trials Transformation Initiative</u>	36
<u>mHealth and patient generated health data: stakeholder perspectives on opportunities and barriers for transforming healthcare</u>	34
<u>An Evaluation of Biometric Monitoring Technologies for Vital Signs in the Era of COVID-19</u>	31
<u>Invisible work and changing roles: Health information technology implementation and reorganization of work practices for the inpatient nursing team</u>	31
<u>Considerations for development of an evidence dossier to support the use of mobile sensor technology for clinical outcome assessments in clinical trials</u>	25
<u>Precompetitive Consensus Building to Facilitate the Use of Digital Health Technologies to Support Parkinson Disease Drug Development through Regulatory Science</u>	23
<u>Remote digital monitoring in clinical trials in the time of COVID-19</u>	22
<u>Fit-for-Purpose Biometric Monitoring Technologies: Leveraging the Laboratory Biomarker Experience</u>	22

<u>Evaluation, Acceptance, and Qualification of Digital Measures: From Proof of Concept to Endpoint</u>	15
<u>Advancing digital health applications: priorities for innovation in real-world evidence generation</u>	14
<u>Remote Digital Monitoring for Medical Product Development</u>	12
<u>Defining and Developing the Workforce Needed for Success in the Digital Era of Medicine</u>	12
<u>BioMeT and Algorithm Challenges: A Proposed Digital Standardized Evaluation Framework</u>	10
<u>EVIDENCE Publication Checklist for Studies Evaluating Connected Sensor Technologies: Explanation and Elaboration</u>	10
<u>Mind the Gap: The Ethics Void Created by the Rise of Citizen Science in Health and Biomedical Research</u>	9
<u>Underuse of oral anticoagulants in privately insured patients with atrial fibrillation</u>	8
<u>Recent Academic Research on Clinically Relevant Digital Measures: Systematic Review</u>	3
<u>The role of digital clinical measures in improving cancer care and research.</u>	3
<u>Sensor Data Integration: A New Cross-Industry Collaboration to Articulate Value, Define Needs, and Advance a Framework for Best Practices</u>	3
<u>Multimodal biometric monitoring technologies drive the development of clinical assessments in the home environment</u>	3
<u>Considerations for Conducting Bring Your Own “Device” (BYOD) Clinical Studies</u>	3
<u>It takes a village: development of digital measures for computer scientists</u>	2
<u>Outcomes of In-Person and Telehealth Ambulatory Encounters During COVID-19 Within a Large Commercially Insured Cohort</u>	2
<u>Recommendations for Defining and Reporting Adherence Measured by Biometric Monitoring Technologies: Systematic Review</u>	1
